BORE, RUST & TANNIN STAIN REMOVER

CC0007

Revised Oct 2001

DESCRIPTION

Bondall Bore, Rust & Tannin Stain Remover is designed to remove unsightly bore stains on concrete, brickwork, pavers, painted surfaces and fibrous sheeting prior to sealing with Bondall Clear Paving Sealer or Bondall Natural Finish Waterproofing Sealer or other coatings.

This product is not just restricted to bore and rust stains. When applied to tannin stains, (caused by wood sap onto masonry surfaces, concrete, brickwork etc.) it will remove the stains from the surface.

It is important to note that Bondall Bore, Rust & Tannin Stain Remover is only a temporary fix to the problem, the removal of the cause such as bore water over-spray, will eliminate future problems. Sealing of the surface with Bondall sealers will assist in protecting the surface of the stains but not prevent the cause.

TEST AREA. Always test on a small inconspicuous area, to ensure that the product is achieving the desired result, prior to application over the entire area. Some surfaces may be affected by bleaching from this application.

FEATURES AND BENEFITS

- Effectively removes light bore, rust and tannin stainscustomer gets value for money.

SURFACE PREPARATION

Area to be treated should be saturated with water, but not ponding prior to application.

APPLICATION

For light stains mix 1 part Bondall Bore, Rust & Tannin Stain Remover with 1 part water and apply to affected area with a brush, roller or low pressure spray.

Wait approximately 2-5 minutes then wash down thoroughly with water. (Do not allow to totally dry before washing down). Areas that are heavily stained may require further treatment. When applying near lawns and gardens, be careful not to splash onto plants. Should this happen immediately flood the area thoroughly with water to neutralise chemicals.

THINNING

For badly affected areas use undiluted. For light stains dilute 1 part Bore, Rust and Tannin Stain Remover with 1 part water. Ensure adequate ventilation during use.
